1. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, line 4, ---,respectively, said ratchet block--- should be inserted following "block" since it is not clear which element is fitted in the cavity and which element is fitted in the slot.

Lines 7-8 are misdescriptive, in view of the specification and drawings, since the elastic urging means is fitted in a holding hole and not in the ratchet block slot.

In line 10, the triggering rod is engaged with a top face of the ratchet block and in line 14, two recesses receive the triggering rod. Applicant appears to be defining two different embodiments. Clarification is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 2, as best understood, is rejected under 35 U.S.C. 102(b) as being anticipated by Chen (6,435,063), Forman et al (6,282,993) or Ling (6,230,591).
